

Classlink

- Classlink is a single sign on (SSO) that allows students access to all of their apps with one click once they are logged in. It works on any computer, laptop, tablet, Chromebook or phone. Once students are set up in Classlink, they do not need to use usernames & passwords for each app. They are saved in a "locker".
- The link to Goshen's Classlink is <https://launchpad.classlink.com/goshencsd> (Googling Classlink is not advised as many more steps are involved.)
- Students log on with their network login:
 - SAS & GIS:
 - Username: `firstname.lastname`
 - Password: `st#lunchnumber`
 - CJH & HS:
 - Username: `firstname.lastname`
 - Password: `st#lunchnumber`

Students must login with the above username/password the first time.

Setting Up Sign in With Google:

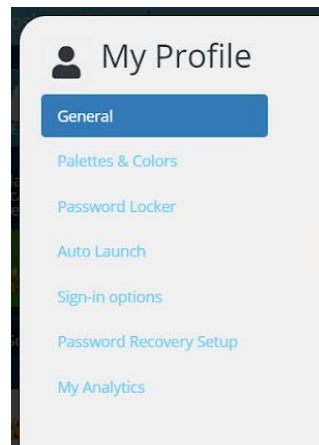

Click on the arrow

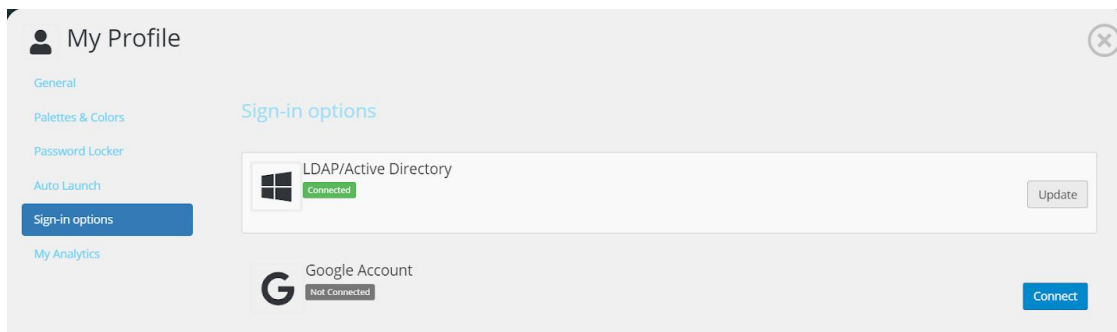

in the upper right corner

Click on My Profile

Click on Sign In Options

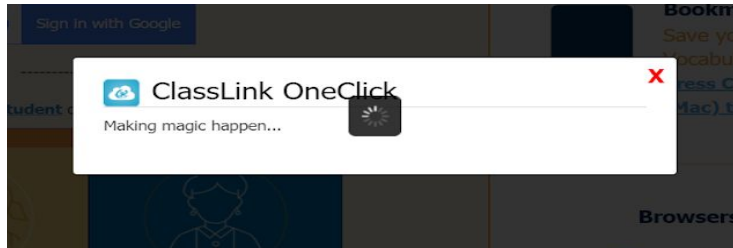

Click the blue Connect box across from Google Account

Click on your Google account. Look for Success! You can sign in with Google.

Saving Your Usernames & Passwords:

- Click on an app your teacher has an account for you.
- Enter your username and password correctly.
- Watch for the "magic"

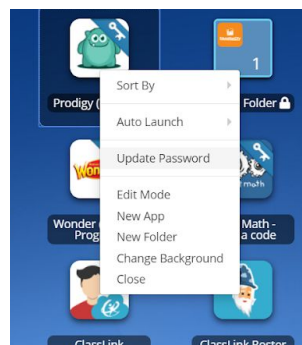

- If you have entered your username and password successfully, you will be in the app.
- If you get the login screen back, you entered either your username and password incorrectly.
 - The username or password will be saved incorrectly in the "locker"
 - You will have to enter your username and password each time you attempt to access the app via Classlink.

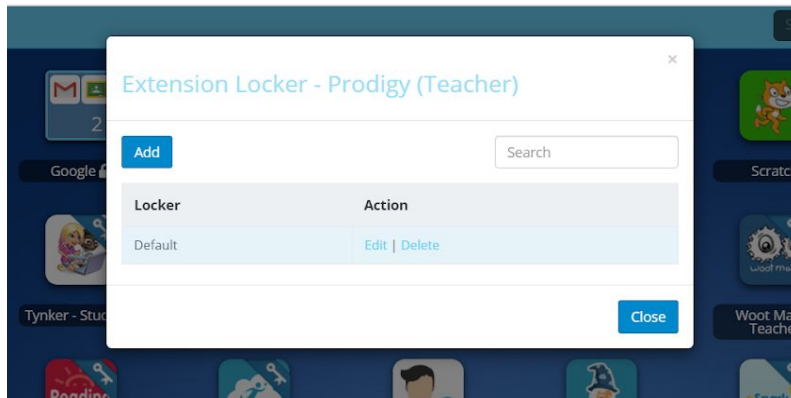

Correcting Your Username/Password in Classlink:

- Right click on the app

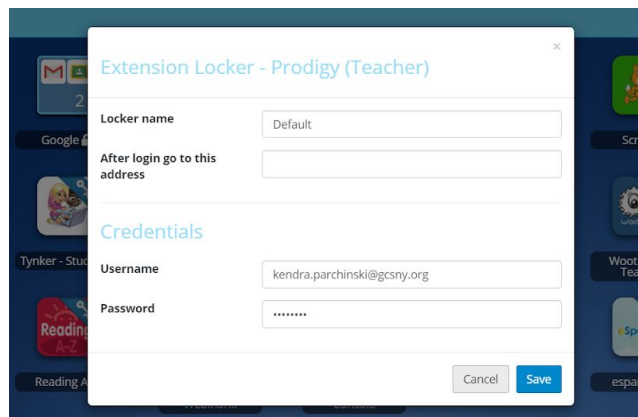

- Click update password

- Click edit

- Delete the username and password. Retype them correctly.

- Click SAVE in the blue box
